

Unstructured Data Analysis: Last.fm Case Study

This report is generated from the Unstructured_data_Music_Analysis_project. The pipeline fetches Last.fm data, parses JSON/CSV/XML, stores records in MongoDB, and uploads selected artifacts to LocalStack S3.

Table 1: Bordered Data

Field	Value	Source
Artist	Coldplay	track JSON
Track	The Scientist	track JSON
Album	A Rush of Blood to the Head	album JSON
Listeners	2800000	track JSON
Playcount	75000000	track JSON

Table 2: Borderless Data

Field	Value	Source
Artist	Coldplay	track JSON
Track	The Scientist	track JSON
Album	A Rush of Blood to the Head	album JSON
Listeners	2800000	track JSON
Playcount	75000000	track JSON

Review Excerpt

Coldplay have always had a gift for making the grandiose feel personal, and "My Universe" is no exception. Collaborating with BTS was a bold move, but it pays off - the track layers English and Korean vocals seamlessly over a pulsing synth-pop backdrop.

The lyrics lean into Coldplay's classic themes: love as a force that defies gravity, distance, and doubt. Nothing groundbreaking, but delivered with enough sincerity that it lands. Chris Martin's falsetto in the bridge is quietly spectacular.

Production-wise it is maximalist but disciplined. The drop never feels cheap. If anything it earns it. A crowd-pleaser that doesn't embarrass itself.
